Commentary

Re-evaluation of cardiopulmonary resuscitation
by E.L. McNeil 1–5

Review Article

Initiation of closed-chest cardiopulmonary resuscitation basic life support. A personal history
by P. Safar 7–20

Evaluation of cardiac vulnerability and antifibrillatory properties of anti-arrhythmic drugs
by A. Smailys, V. Gasiunas and G. Gasiuniene 21–30

The relationship of conjunctival and arterial blood gas oxygen measurements
by S. Podolsky, J. Wertheimer and S. Harding 31–36

The effects of dihydroergocryptine on the neurological and enzyme disorders induced by cerebral ischaemia in rats
by R. Cahn, M.G. Borzeix and J. Legeai 37–48

The biological activity of adrenaline after injection through an intravenous cannula containing alkaline buffer
by R. Gedeborg and L. Wiklund 49–58

Plasma catecholamines, pH and blood pressure during cardiac arrest in pigs
by C.M. Lathers, N. Tumer and J.M. Schoffstall 59–74

Results of cardiopulmonary resuscitation in a cardiology hospital
by A. Timerman, L. Soares Piegas and J.E.M.R. Sousa 75–84

Temporary organ substitution by hemoperfusion through suspension of active donor hepatocytes in a total complex of intensive therapy in patients with acute hepatic insufficiency
by M.S. Margulis, E.A. Erukhimov, L.A. Andreiman and L.M. Viksna 85–94

Esophageal tracheal combitube (ETC) for emergency intubation: Anatomical evaluation of ETC placement by radiography
by M. Frass, J.C. Johnson, G.L. Atherton, F.X.J. Fruhwald, O. Traindl, B. Schwaighofer and C. Leithner 95–102

Use of low-dose neostigmine intravenously in the treatment of supraventricular tachycardia: an immediate bradycardiac effect
by J. Eldor and D.Z.N. Frankel 103–110

Literature of Resuscitation 111–122

Calendar of Future Events 123–124

Special Issue — Hemorrhagic Shock: New Vistas

Introduction 125

Abstracts 127–128

Brief Communications

Cholecystokinin peptides and bombesin reverse hemorrhagic shock in rats
by S. Guarini, S. Tagliavini, C. Bazzani, A.V. Vergoni and A. Bertolini 129–131

Effect of ACTH-(1-24) on the volume of circulating blood and on regional blood flow in rats bled to hypovolemic shock
by S. Guarini, S. Tagliavini, C. Bazzani, A. Benelli, A. Bertolini and W. Ferrari 133–134
Characteristics of brain, heart ventricle and spleen capsule adrenoceptors in rats bled to hypovolemic shock and treated with ACTH-(1-24)
by M. Sandrini, S. Guarini and A. Bertolini 135–137
Resuscitation fluid temperature: effect of delivery method
by F. Arnetoli, A. Peris and C. Tempestini 139–140
β-Endorphin levels after experimental blood loss in human subjects. Correlations with cortisol, ACTH, plasma renin activity, plasma catecholamines and blood pressure variations
by E. Casiglia, E. Vincenti, M. Giacomello, M. Plebani, G. Ruffato, G.P. Rossi, L. Zanin and A.C. Pessina 141–143
ACTH-(1-24) and hemorrhagic shock: preliminary clinical results
by G. Noera, P. Pensa, P. Guelfi, B. Biagi, C. Curcio and B. Bentini 145–147
Preliminary data on the use of ACTH-(1-24) in human shock conditions
by G. Pinelli, G. Chesi, C. Di Donato, A. Reverzani and L. Marani 149–150
Disseminated intravascular coagulation and trauma
by R. Stacca, R. Pignatti, D. Iseppi, M. Bozzola and M. Campisi 151–152
Plasma expanders in hemorrhagic shock
by R. Stacca, E. Bertellini, P. Piccinini, L. Morselli and A. Tassi 153–154
Blood transfusion in hemorrhagic shock
by A. Nieri and M. Bassano 155
Hemorrhagic shock and anaesthesia: operative experience
by P. Romiti, W. Bottari and G. Tamponi 157–158
Shock and traumatic retroperitoneal hematoma: diagnostic and therapeutic problems
by A. Manenti, M. Malagoli, G. Gibertini, A. Miselli and A. Rossi 159
On a case of shock caused by acute puerperal inversion of the uterus
by B. Maurizio, R. Fraioli and C. Contessa 161–162
Left extrapleural hemothorax from rupture of the subclavian artery
by A. Manenti, A. Buttazzi, M. Speranza and A. Barbieri 163–164

Endothelium-dependent responses and their potential relevance to the distribution of blood flow during hemorrhagic shock
by V.M Miller and P.M. Vanhoutte 165–171
β-Endorphin and central control of arterial blood pressure during challenge of circulatory homeostasis
by W. De Jong, P. Sandor, J. Cox-Van Put, M.N. Van Den Berg and P.L.M. Van Giersbergen 173–182
Neural influences on the human pulmonary circulation as a defence reaction to volume depletion
by P. Moruzzi, P. Sganzerla and M.D. Guazzi 183–193
Oxygen-derived free radicals in the pathogenesis of experimental shock
by G.P. Novelli, P. Anglioni, P. Livi and E. Paternostro 195–205
Platelet-activating factor and cytokine interactions in shock
by D. Hosford, M. Paubert-Braquet and P. Braquet 207–218
Sympathetic and hemodynamic adjustments to hemorrhage: a possible role for endogenous opioid peptides
by J.C. Schadt 219–228
Facilitation of the release of noradrenaline: an extra-adrenal effect of adrenocorticotropic hormone
by B. Szabo, L. Hedler and K. Starke 229–242
The therapeutic efficacy of opiate antagonists in hemorrhagic shock
by D.G. Reynolds, N.J. Gurll, J.W. Holaday and R.B. Lechner 243–251

The adrenocorticotropic hormone(ACTH)-induced reversal of hemorrhagic shock
by A. Bertolini, W. Ferrari and S. Guarini 253–267
The C1 area of rostral ventrolateral medulla: a central site integrating autonomic responses to hemorrhage
by D.J. Reis, D.A. Ruggiero and S.F. Morrison 269–288
Adrenocorticotropic hormone (ACTH) and centrally-acting cholinomimetic drugs improve survival of rats with severe hemorrhagic shock through distinct central cholinergic mechanisms
by A. Bertolini, W. Ferrari and S. Guarini 289–297
Effects of fructose 1,6-diphosphate on splanchnic artery occlusion shock in the rat
by F. Squadrito, R. Sturniolo, D. Altavilla, G.M. Campo, G.R. Trimarchi, R. Seuri and A.P. Caputi 299–307
Angiotensin II and atrial natriuretic peptide in the brain: effects on volume and Na^+ balance
by T. Unger, P. Gohlke, M. Kotrba, R. Rettig and P. Rohmeiss 309–319
New prospects for shock treatment: symposium closing remarks
by J.B. McCabe 321–326
Calendar of Future Events 327–328
Subject Index Volume 18 329–332
Author Index Volume 18 333
Contents Volume 18 335–337

(*Contents continued from back cover*)

Neural influences on the human pulmonary circulation as a defence reaction to volume depletion
by P. Moruzzi, P. Sganzerla and M.D. Guazzi 183–193
Oxygen-derived free radicals in the pathogenesis of experimental shock
by G.P. Novelli, P. Anglioni, P. Livi and E. Paternostro 195–205
Platelet-activating factor and cytokine interactions in shock
by D. Hosford, M. Paubert-Braquet and P. Braquet 207–218
Sympathetic and hemodynamic adjustments to hemorrhage: a possible role for endogenous opioid peptides
by J.C. Schadt 219–228
Facilitation of the release of noradrenaline: an extra-adrenal effect of adrenocorticotropic hormone
by B. Szabo, L. Hedler and K. Starke 229–242
The therapeutic efficacy of opiate antagonists in hemorrhagic shock
by D.G. Reynolds, N.J. Gurll, J.W. Holaday and R.B. Lechner 243–251
The adrenocorticotropic hormone(ACTH)-induced reversal of hemorrhagic shock
by A. Bertolini, W. Ferrari and S. Guarini 253–267
The C1 area of rostral ventrolateral medulla: a central site integrating autonomic responses to hemorrhage
by D.J. Reis, D.A. Ruggiero and S.F. Morrison 269–288
Adrenocorticotropic hormone (ACTH) and centrally-acting cholinomimetic drugs improve survival of rats with severe hemorrhagic shock through distinct central cholinergic mechanisms
by A. Bertolini, W. Ferrari and S. Guarini 289–297
Effects of fructose 1,6-diphosphate on splanchnic artery occlusion shock in the rat
by F. Squadrito, R. Sturniolo, D. Altavilla, G.M. Campo, G.R. Trimarchi, R. Scuri and A.P. Caputi 299–307
Angiotensin II and atrial natriuretic peptide in the brain: effects on volume and Na^+ balance
by T. Unger, P. Gohlke, M. Kotrba, R. Rettig and P. Rohmeiss 309–319
